Art Unit: 3611

#### **DETAILED ACTION**

#### Election/Restrictions

Claims 1-24 are withdrawn from further consideration pursuant to 37 CFR
 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or

linking claim. Election was made without traverse in the reply filed on 10/25/04.

Applicant's election without traverse of Group II, claims 25-33 in the reply filed on 10/25/04 is acknowledged.

# **Double Patenting**

2. Claims 25-33 of this application conflict with claim 24-32 of Application No. 10/617,082 37 C FR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/617,608

Art Unit: 3611

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Page 3

4. Claims 25-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Jorgensen et al. (U.S. Patent No. 6,003,624).

Jorgensen et al. disclose a transporter comprising a support platform (20); a plurality of ground contacting elements including two laterally disposed wheels rotatable around an axis (14); a pivot element (16) capable of tilting in the fore-aft plane and pivotally coupled to the axis (compare Figures 1-5; 16 is pivotably coupled at 18); wherein the pivot element is flexibly coupled to the support platform (through a linkage as shown in Figure 4); a user interface (36) for causing the tilt of the pivot element (col. 5, lines -17-28); a sensor module for generating a signal indicative of the tilt of the pivot element (col. 5, lines 17-28; col. 2, lines 34-40); a motorized drive arrangement (32, 34) and a controller commanding the motorized drive based on the tilt (col. 5, lines 17-28).

5. Claims 31-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Kropf (U.S. Patent No. 5,135,063).

Kropf discloses a method of controlling a transporter comprising all elements as claimed, including causing a tilt of a pivot element having a handlebar (28), and commanding the motorized drive arrangement based on at least the tilt, the method further comprising "flexibly coupling the pivot element to the support platform as broadly recited and to the extent that this structural limitation materially affects the claimed method for controlling a transporter.

6. Claims 31-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagamichi (U.S. Patent No. 5,657,828).

Nagamichi discloses a method of controlling a transporter comprising all elements as claimed, including causing a tilt of a pivot element having a handlebar (107), and commanding the motorized drive arrangement based on at least the tilt, the method further comprising "flexibly" coupling the pivot element to the support platform as broadly recited and to the extent that this structural limitation materially affects the claimed method for controlling a transporter.

## Allowable Subject Matter

7. Claims 29 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matt Luby whose telephone number is (703) 305-0441. The examiner can normally be reached on Monday-Friday, 9:30 a.m. to 6:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lesley Morris can be reached on (703) 308-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
